

# International Symposium on: Sustainable Seafood & Nutrition Security (SSNS)

A unique international symposium organized to contribute to sustainable seafood and nutrition security through education, research and training.

## Objectives

1. Share experiences of innovative teaching and learning in the field of sustainable seafood and nutrition security
2. Disseminate the outcomes of the project especially the curricula or offer a "show case" of project outputs
3. Exchange research and development (R&D) outcomes along the seafood value chain and ways to incorporate in curricula
4. Bolster further networking activities
5. Discuss further steps in developing new initiative to expand SSNS to the next level
6. Help create linkages to related initiatives at local, regional, national and international wide level
7. Develop a set of recommendations on sustainable seafood and nutrition security and their applications in teaching and learning

**Abstract** should be max. 2 pages, extended form with other formats of European or World Aquaculture Society Conferences. A hardcopy proceeding of abstracts will be produced and distributed to each participant. A PDF file will be made available online.
